

Assignment 6

Adding Functionality to a Website with JavaScript

Nikhil Saravan

High fidelity

The screenshot shows a web browser displaying the BunBun Bake House website's cart page. The header includes the logo 'BUNBUN BAKE HOUSE', navigation links for 'OUR BUNS', 'ABOUT', 'CONTACT US', 'Sign In', and a shopping cart icon. The main content area is titled 'YOUR CART' and lists two items:

ITEM	QUANTITY	PRICE
Blackberry Cinnamon Bun Double Chocolate glaze	Box of 12	\$14.98
Original (Gluten-free) Cinnamon Bun Sugar Milk glaze	Box of 3	\$10.99

Total: \$24.98 Taxes and shipping calculated at checkout. A 'CHECKOUT' button is visible. Below the cart, a section titled 'YOU MIGHT ALSO LIKE THESE >' features a slider with a single cinnamon bun image.

Design Rationale

The implementation of the cart page now includes a recommendation section where a slider automatically shows the user all the buns to encourage impulse buying. The “Recommendations” text has been replaced with a more relevant “You might also like these >” text. The rest of the cart page is similar to the one in the previous assignment.
